### SPECIAL REPORT

## RETAIL TRADE

Gasoline Service Stations  
and Liquefied Petroleum  
(LP) Gas Dealers

U.S. DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS

The Census of Business reports will comprise seven volumes:

Vols. I, II, III—Retail Trade

Vols. IV, V—Wholesale Trade

Vols. VI, VII—Selected Services

Retail Trade reports will be issued first as separate preprints and then brought together in the following volumes:

**VOL. I. RETAIL TRADE,  
SUMMARY STATISTICS**

A United States summary chapter and chapters on sales by lines of merchandise, sales-size of establishments, employment-size of establishments, single units and multiunits, and legal form of organization. Statistics will be presented for the United States, States, and for standard metropolitan statistical areas, by kind of business. This volume will incorporate the subject reports previously issued, as series BC63-RS.

**VOL. II. RETAIL TRADE, AREA STATISTICS**

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics will be presented by kind of business, for counties, cities, standard metropolitan statistical areas, for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail will vary in accordance with the number of retail establishments in an area. This volume will incorporate the area reports previously issued as series BC63-RA.

**VOL. III. MAJOR RETAIL CENTER STATISTICS**

A summary chapter and chapters for each of 116 standard metropolitan statistical areas (SMSA's). Each SMSA chapter will present statistics: (1) For retail trade by kind of business, and for hotels and motion picture theaters (a) in the entire SMSA, (b) in almost all cities of 100,000 or more inhabitants, and (c) in central business districts of these cities; and (2) for major retail centers outside the central business district (a) sales and establishment counts in three major subgroups of retail trade and (b) establishment counts only by kinds of business. This volume will incorporate the major retail center reports previously issued as series BC63-MRC.

## Introduction

This report presents data from the 1963 Census of Business for Gasoline Service Stations and Liquefied Petroleum Gas Dealers.

The projected number of gallons of gasoline sold by gasoline service stations are shown for the first time in a Census of Business. In 1963 there were 211,473 gasoline service stations and the receipts of these stations from sales of all commodities and services were almost 18 billion dollars.

The 165,863 gasoline service stations with payroll during 1963 were asked to report the number of gallons of gasoline sold. The sales of the 112,372 which reported number of gallons sold accounted for 65.5 percent of the total sales for all gasoline service stations.

Sales of slightly over 28 billion gallons of gasoline were reported by the service stations reporting this item. Based on the sales of those reporting the total gallons sales of all gasoline service stations was projected to a total of almost 43 billion gallons. In projecting the number of gallons sold by all gasoline service stations, each county and state was projected independently. Therefore, the state total may not exactly equal the sum of the counties in that State. Data were not projected for those counties in which the sales of the service stations reporting the number of gallons sold amounted to less than 50% of the total sales of all service stations in the county. The symbol (V) "Insufficient sales of those reporting to show separately" was inserted in lieu of the data. The projected totals for the States and for the United States do, however, include data for all counties.

California led all other States with a projected total of 4.8 billion gallons sold by gasoline service stations in 1963. New York with 2.8 billion gallons, Texas 2.7 billion, and Ohio with 2.4 followed in that order.

In gallon sales by county, Los Angeles County, California was first by a large margin with 1.9 billion gallons. Cook County, Illinois (Chicago) ranked second with 991 million gallons. Wayne County, Michigan (Detroit) with 681 million gallons, and Nassau County, New York with 405 million gallons were third and fourth respectively in the county ranking.

**AUTHORITY AND SCOPE.**—The Census of Business is required by law under 13 U.S.C., sections 131 and 224. The 1963 census covered businesses in retail trade, wholesale trade, selected services, dental laboratories, and public warehousing operated in the United States, Guam, and the Virgin Islands. A separate 1963 Census of Business and Manufactures for Puerto Rico was conducted jointly with the Commonwealth Government. For definitions, see the appendix.

**KINDS OF BUSINESS COVERED.**—Retail trade as defined in the Standard Industrial Classification (SIC) Manual<sup>1</sup> includes all establishments primarily engaged in selling merchandise to personal, household, and farm users. In this report, it also includes liquor stores operated by State and local governments. Retail trade excludes post exchanges, ship stores, and other similar establishments operated on military posts by agencies of the Federal Government. A separate

presentation of the data for such establishments will appear in the final area reports, series BC63-RA. Data for administrative offices, warehouses, and other units which service and are auxiliary to retail establishments within the same organizations, also excluded here, will be presented in later reports. See the appendix, "Explanation of Terms", for definitions of the kind-of-business categories for which data are shown in this report.

**METHOD OF ENUMERATION.**—For purposes of coverage in the 1963 Census of Business, retail establishments were divided into two categories—those with some paid employment during 1963 (i.e., the "employer" universe) and those with no paid employment during 1963 (i.e., the "non-employer" universe). The method of obtaining census information for these two groups is described below:

**Enumeration of "Employers."**—Information for establishments with some paid employment during 1963 was obtained by means of a mail canvass. Report forms were mailed to all business firms included in the active records of the Internal Revenue Service as subject to payment of Federal Insurance Contributions Act (FICA) taxes (i.e., employers of one or more persons) and which were classified in the records of the Social Security Administration (SSA) as wholly or partially engaged in retail and wholesale trade, and in manufacturing and mineral industries. Also included were those classified in major groups 70 (except 702 and 704), 72, 73, 75, 76, 78, and 79 in the service industries portion of the SIC Manual; in SIC industry 8072, dental laboratories; and in public warehousing, SIC major group 42 (except 421). In addition, report forms were mailed to all establishments which the SSA had not classified by kind of business prior to mailing of census report forms. Each establishment was mailed a report form appropriate to its SSA classification (for those cases for which SSA classification had not yet been established, a general purpose form was used), but its census classification was determined by replies to questions on the census report form.

**Enumeration of "Nonemployers."**—Information for this group of establishments was obtained from the 1963 Federal income tax returns of retail businesses other than those represented in the active FICA records of the Internal Revenue Service. Although made up of a large number of establishments, the nonemployer segment accounts for only about 5 percent of total retail sales.

Data were compiled from only one-half of the nonemployer tax returns and were multiplied by two to establish census totals. Only those establishments were included here which reported a sales volume of \$2,500 or more during 1963, or, having been in operation for less than the full year, reported sales which would have reached a total of \$2,500 or more on an annual basis.

**CENSUS DISCLOSURE RULES.**—In accordance with Federal law governing census reports, any data which disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

<sup>1</sup>Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual*, 1957, and *Supplement to 1957 Edition*, 1963.

## EXPLANATION OF TERMS

**Establishments**—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the “company” or “enterprise” which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual “establishments” rather than “companies.” (Enterprise statistics reports, Series ES, will be issued at a later date covering the Censuses of Business, Manufactures, and Mineral Industries.) A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification Manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

In the case of leased departments, i.e., separately owned businesses operated as departments of a retail business under another ownership (e.g., a separately owned shoe department in a department store), only a single establishment, combining leased departments with the retail establishment in which they are located, is recognized for 1963 census purposes.

The “number of establishments” shown in this report is the number in business at the end of the census year.

**Sales**—Sales include merchandise sold, and receipts from repairs and from other services to customers whether or not payment was received in 1963. Sales are net of deductions for refunds and allowances for merchandise returned by customers. Total sales exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the store directly from customers and paid directly by the store to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed along to the retailer are also included.

Sales do not include retail sales made by manufacturers, wholesalers, service establishments, and other businesses whose primary activity is other than retail trade. They do, however, include receipts other than from the sale of merchandise at retail (e.g., service receipts, sales to industrial users, sales to other retailers, etc.) by establishments primarily engaged in retail trade.

Although the count of establishments in this report represents the number in business at the end of the year, the

sales figures include sales of all establishments in business at any time during the year. Although nonemployer establishments are included in the tables if they operated at an annual sales volume rate of \$2,500 or more, their reported sales have not been projected to a full year's operation.

**Payroll, entire year**—Payroll includes salaries, wages, commissions, bonuses, vacation allowances, and the value of payments in kind (such as free meals, lodgings, etc.) paid during the year to all employees. Gratuities received by employees from patrons are not included. For corporations, it includes amounts paid to officers and executives; it does not include compensation of proprietors or of partners of unincorporated businesses. Payroll is reported before deductions for social security, income tax, insurance dues, etc. Payroll is not limited to “taxable” payroll as reported on IRS Form 941.

**Payroll, workweek ended nearest November 15**—This item consists of payroll, as defined above, paid to persons on the payroll in the pay period ended nearest November 15, 1963. Establishments with a pay period other than a week were requested to adjust the figures to a weekly basis.

**Paid employees, workweek ended nearest November 15**—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll for the workweek ended nearest November 15.

**Active proprietors of unincorporated businesses**—These data are computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors if the establishment was in business during the week of November 15.

## KIND-OF-BUSINESS CLASSIFICATIONS

Retail trade, as defined in major groups 52 through 59 of the 1957 edition of the SIC Manual and its supplement<sup>1</sup> issued in 1963, and as covered in the 1963 census, includes establishments primarily engaged in selling merchandise to customers for personal, household, or farm use. Some of the important characteristics of retail trade establishments are: The establishment is engaged in activities to attract the general public to buy; the establishment buys or receives merchandise as well as sells; the establishment may process its products, but such processing is incidental or subordinate to selling; and the establishment is considered as “retail” by the trade.

In this report, liquor stores operated by State and local governments, classified in SIC major groups 92 and 93, are also included.

Excluded from retail trade are places of business operated by institutions and open only to their own members or personnel, such as restaurants and bars operated by clubs, school cafeterias, eating places operated by industrial and commercial enterprises for their own employees, establishments operated by agencies of the Federal Government on military posts, hospitals, etc. (As noted previously, there is a table in this report showing data for establishments on military, air, and naval posts.)

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions

<sup>1</sup> Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual*, 1957, and *Supplement to 1957 Edition*, 1963.

of the 1957 edition of the SIC Manual and its supplement, issued in 1963. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

It should be noted that kind-of-business classifications are not interchangeable with commodity classifications. Most businesses sell a number of kinds of commodities. The kind-of-business code assigned generally reflects either the individual commodity or commodity group which is the primary source of the establishment's receipts or some mixture of commodities which characterize the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the "food group" classification excludes stores selling some food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as "food stores" some of their receipts may be derived from the sale of nonfood products. (Some indication of the extent to which various broad groups of commodities or lines of merchandise are characteristic of different kinds of business will be available in the Census of Business report, Sales by Line of Merchandise, Series BC63-RS.)

As noted in the Introduction under "Method of Enumeration," the 1963 census data are based on reports from two different sources, for "employer" and "nonemployer" establishments. "Nonemployer" establishments were classified on the basis of information supplied on the 1963 Federal income tax returns. Because of the nature of the information available on the tax returns, the kind-of-business classifications for these establishments represent primarily a "self-designation" by the establishments.

"Employer" establishments, on the other hand, were canvassed by mail and required to complete report forms especially designed for this census. These reports on census forms

include information on sales by merchandise lines and other classification data which make possible a more uniform system of classification.

Descriptions of those kinds of business for which data are provided follow.

#### Automotive Dealers (SIC Major Group 55, Except 554)

NOTE: This group does not include establishments primarily engaged in selling trucks and motorized industrial equipment. Such establishments are included in the wholesale trade portion of the Census of Business.

**Passenger car dealers, franchised (SIC 551)**—Establishments primarily selling new automobiles, or new and used automobiles. These establishments frequently operate repair shops and used car lots and may carry stocks of replacement parts, tires, batteries, and automotive accessories, and may also sell trucks. In some tabulations this category is subdivided to show data separately for establishments which sell (1) new domestically produced passenger cars only, (2) new imported passenger cars only, and (3) new domestic and imported passenger cars. Used car lots and repair shops operated by franchised dealers are not recognized as separate establishments. Data for such operations are consolidated in this category with other data for franchised passenger car dealers.

#### Gasoline Service Stations (SIC 554)

Establishments primarily selling gasoline and other automotive petroleum products. Establishments called garages but deriving the larger part of receipts from gasoline and oil sales are included.

**Liquefied petroleum (LP) gas dealers (SIC 5984)**—Establishments primarily selling liquefied petroleum gas, either in bulk or bottled.
